

# 1030/1035 BUCKET HUB UPGRADE

Do you have a 1030/1035 folder built prior to September 1999? Do you want a smoother flowing, more consistent delivery?

*Upgrade!*

The new Manugraph DGM bucket hubs and bucket fingers give you the following benefits:

- Longer fingers add support to the product for smoother flowing 1/2 fold delivery.
- A more rigid finger that is less prone to bending in paper jams.
- Fingers and hubs designed for repeatability in manufacturing allowing fingers to be synchronized from hub to hub.
- Same design as used on higher speed 1240 and 1255 folders.

Upgrade includes 4 new bucket hubs, 20 new bucket fingers, and hardware.
