

# 1030/1035 TUCKER BLADE UPGRADE

Do you have a 1030/1035 folder built prior to March 2000? Do you want a more accurate fold out of your jaw cylinder?

*Upgrade!*

The new Manugraph DGM tucker blade gives you the following benefits:

- A shallower angle on the tucker for less interference pulling out of the jaw.
- More accurate half fold lap possible at higher speeds.
- Longer tucker blade life.
- More pin short lap.
- More rigid tucker bar support.

Upgrade includes new tucker bar, new tucker blade, new tucker blade stiffener, new tucker blade clamp bar, and hardware.

Old style tucker bar spacers for different laps will work with the upgraded tucker bar assembly. Replacement tucker bar spacers are also available.
